

Traffic and weather is a great help to the traveling public. I use it all time to check weather and traffic in the cities I am going to. Many time I am out of the range of the radio stations in the city and am able to get up to the minute traffic when I need it. Most of the stations on the radio only give traffic at set times and weather on the hour. XM is providing an excellent service by having traffic and weather all the time for people who need to know whats going on. Thank You
